

ComfortView - SLIM™

A LINE OF COMPACT, MOBILE WORKSTATIONS,
DESIGNED FOR FLEXIBILITY AND SPACE SAVINGS

Bulky ergonomic workstations typically don't pass through a doorway fully assembled and cramp smaller reading rooms with limited space. And with space always at a premium, getting the most out of any reading area is critical.

CHALLENGES:

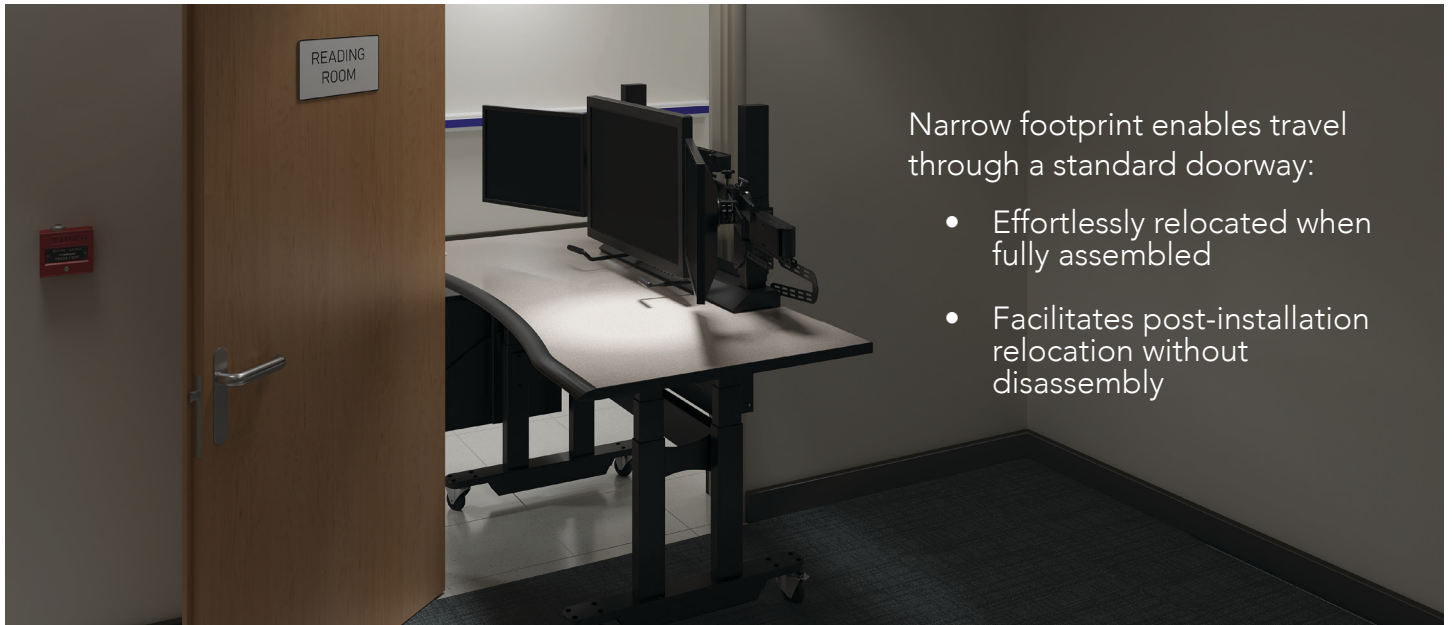

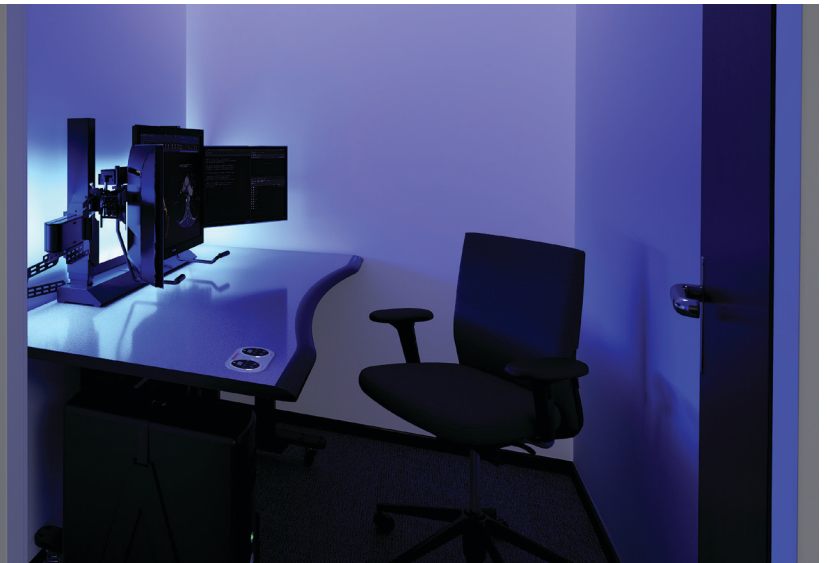

- Relocating workstations without disassembling them due to:
 - Renovations
 - Repairs
 - Shifting clinical needs
- Maximize reading room space utilization
- Assembling workstations on-site

BENEFITS:

- Passes through a standard doorway, fully assembled
- Supports the most common radiology display configurations
- Rolls anywhere to meet changing needs
- Flexible, space saving configurations
- Easier and faster to implement

Space saving design improvements include narrower worksurface and more compact monitor mount that can alleviate cramped workspaces.

Make efficient use of smaller spaces.

Narrow footprint enables travel through a standard doorway:

- Effortlessly relocated when fully assembled
- Facilitates post-installation relocation without disassembly

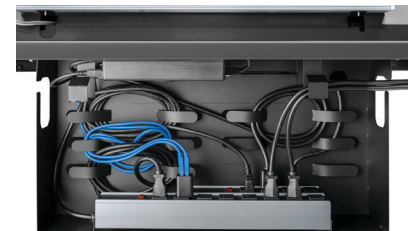

EFFORTLESS PORTABILITY BY ONE PERSON:

- Easily setup offsite, then moved to the reading location
- Enables repairs and upgrades away from reading area
- Unplug and go

KEY FEATURES:

- Self-contained cable management and power distribution
- Includes easy rolling castors

SLIM BENEFITS FROM THE CAPABILITIES FOUND ON ALL OUR WORKSTATIONS:

- Electronic height adjustable work surface
- ComfortView™ monitor mount
- Ambient back-lighting
- Integrated cable management

Our full range of accessories are available to customize your workstations and ensure they provide a productive and easily managed environment.
