The need for an ergonomic workspace persists when you leave the hospital.

**CHALLENGES**
- Create an environment that fosters concentration
- Sitting long hours at a multi-monitor workstation
- Remote collaboration with other physicians
- Minimize the risk of burnout

**BENEFITS**
1. Maximize productivity
2. Support good ergonomic workplace habits
3. Facilitate remote consultations

**SOLUTION**
Ergonomic, purpose-built workstations from RedRick.

“RedRick provided a PACS workstation that provides both excellent ergonomics and the ability to reposition the monitors to provide a large multipurpose desk space ideal for my requirements in my home office. I spent over a year looking for alternatives and kept coming back to RedRick, which succeeds in fulfilling all my requirements.”

Dr. Josh Burrill. Interventional Radiology Lead. Royal Columbian Hospital
IS YOUR REMOTE OFFICE WELL DESIGNED?

Maintain your efficiency, health and well-being while working remotely by:

- Maximizing usable space
- Sitting and standing throughout the day
- Optimizing monitor height, distance, angle and back lighting to reduce visual fatigue

WORKSTATION ACCESSORIES

Workstation accessories should minimize risk of repetitive strain injuries and enhance productivity by:

- Minimizing clutter
- Enabling personalization of shared workspaces
- Maximizing usable work surface area
